

Key Features

- Wind safety latch
- Galvanized Steel Base
- Easy to install on to unit
- Hinged access for easier servicing
- This ducting kit is designed to relocate unwanted heat from the exhaust of the Optimum series

Features

This kit allows the warm exhaust air to be ducted to another area. Ideal if the room adjacent to your cellar is not ideal for warm air to be exhausted into. The kit include the Thermostat Controller, which will turn on and push warm exhaust air away from the system, preventing the unit from overheating. The in-line fan is capable of moving warm air through 25 feet of 8" flex ducting (not included). The in-line fan can be set to automatically turn on at varying temperatures in order to conserve the most electricity.

Specifications

Duct Kit Size	Optimum Small	Optimum Large
Use for Optimum Models	2200, 3300, 4400	8800
Dimensions	14" W x 8" H x 36" D	14" W x 8" H x 43" D
Weight (lbs)	14	15
Duct Size	Intake: 8" Exhaust: 8"	Intake: 10" Exhaust: 8"
Voltage Rating	110V - 3 amp	
Ducting Options	ONLY the exhaust side can be ducted using the optional ducting kit
